ABSTRACT

This paper clearly explains about results of MDG, hurdles in SDG and other new future goals. It explains the necessity of providing solutions for Global Warming and Global Recession for livelihood on planet. It explains about the worst strategies of world community (UNO, World Bank, FAO, IMF, Developed nations...) and their inefficient role in protecting peace. Its already been confirmed that due to global warming, livelihood on Earth in one decade will be totally destroyed and Earth will become like Mars.
