### **ABSTRACT**

*Academic libraries choose the Internet as their primary publication of pre-publication platform along with their other sources. It supports remote collaboration & easy to access cross-disciplinary research. The internet can be used for conducting research to locate references-Literature reviews, Data Collection, Data analysis, Dissemination. Google allows the user to keywords which should appear, may appear, must appear, and must not appear in a document. Google Scholar provides a simple way to broadly search for scholarly literature. From one place, you can search across many disciplines and sources: articles, thesis, books, abstracts, and court opinions, from academic publishers, professional societies, online repositories, universities and other websites.*

**KEYWORDS:** *Internet, Google, Google Scholar, Information, User*
